募集要項

Job Description

The work you will be in charge of will mainly be customer proposals, infrastructure design, construction, and operation using AWS and your own infrastructure.

Utilizing technical knowledge and experience, you will be in charge of proposing and designing the optimal configuration to solve the customer's issues and requests, building after receiving an order, and operation.

Cloud services are updated on a daily basis, so the ability to constantly collect information on your own and actively work on new services and technologies is required.

In addition, in addition to working closely with our engineers and sales, it is necessary to attend technical meetings with customers as necessary, and to communicate with customers regarding technical support. We are looking for someone who can communicate smoothly both inside and outside the company.

スキル・資格

Required skill

3+ years experience in building and operating Linux servers

- ・ Basic knowledge of AWS services (VPC, IAM, EC2, RDS, ELB, CloudFront, auto scaling, etc.)
- ・ AWS services (VPC, IAM, EC2, RDS, ELB, CloudFront,
- ・ Experience building and operating

Linux servers and middleware (Apache, Mariadb, Postfix, Qmail, Dovecot, MySQL, PostgreSQL, etc.)

- ・ Script languages (JavaScript (Node.js), Typescript, Python, Perl , PHP, Bash, etc.) ・ Experience creating operation tools (shell scripts for work automation, etc.)
- ・ Basic understanding of networks (knowledge of TCP/IP, knowledge of protocols such as DNS, HTTP, etc.)

★Location : Kyoto

★Remote OK, Flex time!
