- Demonstrable competency in strategic planning & management
- Strong Team with Visionary leadership
- Niche service offering with ability to Scale business.

Positive, energetic, passionate, business environment with management who committed to your success.

会社説明

We provide IT solutions and globalization services for Japanese companies both within Japan and across the globe. Our team of bilingual engineers and managers deliver complex IT solutions in ERP (SAP), JAVA / MS / Open source platforms for customers across Japan, Europe, Asia and India geographies.

Further, in recent years we have started delivering services across various industries in emerging technologies such as Blockchain, AI, Analytics, Internet of Things (IoT) and Robotic Process Automation (RPA) as well. Furthermore, from the perspective of human resource development, our Japanese language training department strengthens and enhances the language skill of Bilingual technical professionals. We also function as a human resource consultancy dispatching value added resources to Japan after imparting Japanese skills training and technical skills training. As a part of our learning management services, we offer e-learning and video learning development services, state-of-the-art learning management systems on the cloud to host content.
