募集要項

Looking for an exciting opportunity to manage various projects in the enterprise technology space? Look no further! EIRE Systems is seeking an experienced Enterprise Technology Project Manager to work hand-in-hand with our global insurance industry client. The ideal candidate will have a background in project governance and IT PMO, with strong experience in managing various projects in the enterprise technology space. The project manager should be familiar with agile project management methodology and have an understanding of SDLC and release to production processes.

Responsibilities:

- Manage various projects in the enterprise technology space, including systems/applications integration, development, and automation projects.
- Successful management of the delivery of projects and products using appropriate agile project management methodology

- Lead the collaborative, dynamic planning process - prioritizing the work that needs to be done against the capacity and capability of the team – working with the scrum master to enable squad-based delivery
 - Management of one or more cross-functional & multidisciplinary team(s)
 - Ensure all products and project deliverables are built to an appropriate level of quality in accordance with SDLC and released to production as per defined processes and timeline
 - Provide regular reports on delivery health including time, cost, scope, benefits, and risks
 - Establish a project & product view of critical path milestones and ensure tracking and reporting against these
 - Assess and report key delivery risks, issues, and dependencies
-

スキル・資格

Requirements:

- Professional level Japanese language skills (able to produce project reports and documentation in Japanese).
 - PMP, Prince2 or other relevant certification is preferred.
 - 3+ years of experience in project governance and IT PMO, managing various projects in the enterprise technology space.
 - 3 or more years experience managing business critical projects end to end (experience across PMLC and SDLC)
 - Past experience specifically managing large scale programs or projects
 - Past experience managing migration projects of system platform in life insurance company preferred
 - Understanding of Agile practices as applied to project management
 - Proficient in project management tools, templates and project life cycle
 - Excellent communication, collaboration, and interpersonal skills.
-

会社説明

EIRE Systems is a leading independent provider of professional IT services to the financial, insurance and multinational sectors in Japan and throughout the Asia Pacific region. EIRE Systems has expertise across a wide spectrum of Information Technologies, with a track record for successfully completing hundreds of projects and IT services assignments since its establishment in 1996.

We provide professional IT services, both project-based and ongoing operational support, in two main areas:

1. IT Services
2. Project Management

EIRE Systems provides a wide-range of career choices for internationally-minded technology and support professionals. From the company's small beginnings, EIRE Systems continues to increase its local, regional and global expertise. We have established offices in Tokyo, Hong Kong, Singapore and Shanghai and are reaching further as we grow our presence throughout the Asia-Pacific region.
