募集要項

Appealing Points:
①Our company has a diverse workforce representing various nationalities!

②We have a sustainable growth cycle for all services. We do it all in-house.There are few companies that do it all in-house, making this a valuable experience!

③It is an environment where you can grow and take on challenges!

Business Description:

We are a subsidiary of the AirTrip Group, a company listed on the Tokyo Stock Exchange Prime Market. Our corporate philosophy is "Creating a Japan that people want to visit again", and our value proposition is to solve the anxiety and inconveniences, such as the "language barrier," experienced by foreign visitors and residents in Japan. We are actively expanding our business. Our product offerings include WiFi rental services, healthcare services, real estate information services, concierge apps, web media, and camping cars rental.

Job Description:

As a UI/UX Designer, you will be responsible for cross-functional communication within the company, conducting ideation, prototyping, requirement definition, UI design, and overall product design. You will be involved in various projects, including not only existing product and feature releases but also the launch of new products.

Main Responsibilities:

・Product requirements definition
・Product UI design
・Analysis of outputs
・Construction and operation of design systems
・Development and management of various design-related guidelines
・Collaboration and involvement in decision-making with product managers and engineers
・Front-end implementation (if possible)
・Creative production
＊Tools/Languages: You can use familiar and preferred tools such as Sketch, Figma, Adobe XD, etc.

スキル・資格

Required Skills/Requirements:

・Experience in UI design for web and mobile applications
・A design portfolio (intermediate deliverables acceptable)
・Understanding and interest in the workings of of applications and software

Welcome Skills:

・Basic knowledge and practical experience in web front-end development, including HTML/CSS, JavaScript, etc.
・Experience in discovering and analyzing customer issues through design research
・Experience in defining customer journeys, product values, and conducting UX design
・Business-level English proficiency

Desired Qualities:

・Able to demonstrate leadership and promote design
・Excellent cross-functional communication skills to promote design within the company
・Ability to make improvements based on reviews and user feedback
・Always conscious of the path to achieve goals
・Ability to connect design output with product growth
