募集要項

Executive Summary:

- Solid Cisco Unified Communications Manager and Enterprise Voice Operations and Engineering experience.
- The position is to fill in the role of regional Cisco Voice Engineer supporting L1/L2 of Operations and Engineering.
- The role includes migration, upgrades and deploying of Cisco CUCM / CUC / Voice Recording system.

Job description:

- To work in a regional voice operations and project team that manages the low-level technical delivery of all voice infrastructure projects and provides governance to the organization strategic partners.
- To provide comprehensive product knowledge on Cisco voice technology.
- Ability to provide onsite support for user testing of CUCM and Cisco phone features and functionalities during user migrations.

- Ability to handle and coordinate phone deployments during user / floor / site migrations.
 - Ability to lead the project and provide High- and Low-level design.
 - Provide L1/L2 support for business impacting issues.
 - Work with internal and external project managers to report issues and deliver solutions.
 - Engage with the business and external vendors to deliver solutions.
 - Ensures user satisfaction by providing preventative maintenance, troubleshooting, and quickly
 - Participates in the design, development, and implementation of complex system engineering activities involving cross-functional technical support, systems programming, and data center capabilities.
 - This will include components of the assessment and optimization of system design and review of user requirements.
 - Able to provide and communicate technology solutions across differing audiences including technical, managerial, business executives, and/or vendors.
 - Leads the resolution process for problems where analysis of situations or data requires an in-depth evaluation of various factors.
 - Contributes to the determination of technical and operational feasibility of solutions.
-
