募集要項

- Product Strategy and Vision:

- Craft a SaaS and B2C-centric product vision and strategy in alignment with company objectives.
- Use market research, competitive analysis, and customer feedback to guide product decisions.

- Product Planning and Roadmap:

- Coordinate with teams to define clear product requirements.
- Collaborate with engineering for timely product delivery, balancing scope and quality.

- Product Development and Execution:

- Oversee the product development process, from conception to launch.
- Promote agile practices for efficient product development.
- Evaluate product quality, ensuring it aligns with customer expectations.

- Stakeholder Management:

- Work closely with internal teams to enhance product offerings.
- Build relationships with external stakeholders for feedback and validation.

- Product Performance and Optimization:

- Monitor metrics and feedback for product improvement opportunities.
- Lead product updates based on data and customer input.
- Partner with marketing and sales for optimal product positioning.

スキル・資格

- Bachelor's in business, computer science, or engineering.
- Proven experience with SaaS software products.
- Demonstrated ability to launch competitive products.
- Strong strategic, analytical, and leadership skills.
- Business level Japanese & English
