募集要項

About the Company:

We are currently seeking a Lead Engineer to join one of our client's teams, a company that is a leader in the Medical Big Data domain. Their mission is to revolutionize healthcare by utilizing big data to create impactful solutions for both consumers and medical institutions.
They have an extremely strong and growing reputation, have a friendly team of passionate and talented developers where you can grow and expand your career and skills.

Why You Should Apply:

• The company offers great opportunities for employees to build their careers growth
• Gain extensive experience, from launching a product to designing, implementing to releasing
• Flexible working hours (core hours: 11:00-15:00)
• Assistance programs for technical book purchases and engineering event participation
• Continuous learning and growth opportunities in a supportive work culture.

スキル・資格

Ideally, you have:

- Preferably 3 years or more of experience in one of the following :
  - Web backend development experience using Ruby, Python, etc.
  - Web front-end development experience using TypeScript, React.js, etc.
  - System development experience using cloud services such as AWS and GCP
- Ability to design tables for business systems using RDB
- Experience in defining API schemas such as OpenAPI and GraphQL
- Good communication skills

Welcomed Skills:

- Experience or knowledge in the healthcare or medical field.
- Experience in infrastructure management using tools like Terraform or Ansible.
- Contribution experience to open-source projects.
