募集要項

About the company

We are currently looking for an Advanced Manufacturing Engineer to join a highly profitable international automotive company with operations in Japan. This company operates a state-of-the-art technical centre with complete product development capabilities.

Who are you

- You will have engineering experience in manufacturing operations (automotive industry preferred but not essential).
- You will be passionate about process optimization and continuous improvement methodologies

Why apply

- You will shape manufacturing excellence for premium automotive products.
- Work with cutting-edge production technologies and methodologies.
- Drive operational excellence in a world-class technical centre.

スキル・資格

Skills, Knowledge, and Experience in ONE or MORE of the following:

- Engineering degree in a relevant manufacturing or mechanical field
- Professional experience in manufacturing operations (automotive preferred)
- Strong technical understanding and industrial engineering knowledge
- Business-level Japanese (N3+) for production floor communication
- Willingness to relocate to Kansai

Experience in ONE or MORE of the following areas is desirable:

- Knowledge of lean manufacturing, Kaizen, 5S, and continuous improvement
- ◆ VE/VA (Value Engineering/Value Analysis) experience
- 3D CAD skills and project participation experience
- Conversational English and familiarity with quality systems
