募集要項

About the Company:

A well established leading medical big data company with a constantly increasing number of clients, that utilizes a unique encryption and data analysis technology. Looking to expand in its mobile app engineering department.

About you:

- Can successfully develop new products and services?
- Do you enjoy collaborating with diverse experts?
- Are you experienced with React Native, Flutter, Swift or Kotlin?

If you answered YES to any of these questions, then this is the lifetime opportunity for YOU!

What you will do:

- Work with a world class engineering team.
- Plan, execute and maintain your own app products for clients.
- Make your own decisions and changes on development of your work.

Why you should apply:

- The company provides linear career progression all the way up to Team Lead.
- One of a kind app development project.
- Competitive salary based on experience.

If you're a creative thinker and problem solver, then this position is for YOU!

スキル・資格

Required:

- Experience in developing and operating Mobile apps, either native or cross-platform.
- Have experience using React Native **OR** Flutter **OR** Swift **OR** Kotlin.

Nice to have:

- Can do attitude.
- Desire to build revolutionary systems.
- Independent mindset.

Japanese level: Native / Business level (N2 and above)
