## 募集要項

The consultant contractor will manage business data analytics with a focus on Business Intelligence (BI) technical aspects, including CRM data and systems.

Key tasks involve designing and implementing data warehouse architecture and BI tools.

**Principal Deliverables:**

1. **System Design and Implementation:**
   - Develop a comprehensive DWH and BI platform, including data models and analytics tools.
   - Implement dashboards and reporting tools tailored to business needs.
2. **Project Management:**
   - Lead and manage global BI projects, ensuring effective collaboration and timely execution.

3. **System Migration:**
    - Oversee the migration from legacy BI platforms to modern cloud solutions.
4. **Maintenance and Support:**
    - Provide ongoing system maintenance and support, ensuring optimal performance and user satisfaction.

## スキル・資格

- Proven experience in ETL development and data warehousing.
- Expertise in dashboard development using BI tools like PowerBI.
- Experience in managing BI projects, preferably in the retail industry.
- Strong analytical skills and user-oriented communication.
