# 募集要項

The consultant contractor will manage business data analytics with a focus on Business Intelligence (BI) technical aspects, including CRM data and systems.

Key tasks involve designing and implementing data warehouse architecture and BI tools.

## **Principal Deliverables:**

## 1. System Design and Implementation:

- Develop a comprehensive DWH and BI platform, including data models and analytics tools.
- Implement dashboards and reporting tools tailored to business needs.

# 2. Project Management:

• Lead and manage global BI projects, ensuring effective collaboration and timely execution.

# 3. System Migration:

• Oversee the migration from legacy BI platforms to modern cloud solutions.

### 4. Maintenance and Support:

• Provide ongoing system maintenance and support, ensuring optimal performance and user satisfaction.

### スキル・資格

- Proven experience in ETL development and data warehousing.
  Expertise in dashboard development using BI tools like PowerBI.
- Experience in managing BI projects, preferably in the retail industry.
- Strong analytical skills and user-oriented communication.
