募集要項

Our client is a Singaporean B2C app company, who are currently expanding their reach in the Japanese market.

The local team is focussed on product innovation (0 to 1), and is seeking to hire an experienced Senior Product Manager to

the Innovation Team.

Key Responsibilities:

- **Product Development:** Lead the entire product lifecycle from idea to launch, identify opportunities through market research, and collaborate on product vision and strategy with cross-functional teams.
 - **Product-Market Fit:** Analyse the market to understand customer needs and competition, and test hypotheses to find product-market fit.
 - **Experimentation:** Use agile methodologies for rapid experimentation, track metrics to measure success, and promote a team culture of continuous improvement.
 - **Technology:** Stay updated on emerging technologies and collaborate with engineering for feasibility and innovation.
-

スキル・資格

- Bachelor's degree in Business, Engineering, or a related field; MBA or advanced degree is a plus.
 - 3 to 6 years in product management, ideally developing products or new features from scratch.
 - Strong understanding of market research, consumer insights, and competitive analysis.
 - Demonstrated ability to lead product experimentation in a fast moving environment.
 - **Fluent Japanese and English skills.**
 - Passionate about technology and innovation, with a track record of staying current with industry trends.
-
