募集要項

BIOS is looking for experienced data center engineers to join international support team servicing a global provider in Tokyo/Osaka. Fast Moving environment where you will be expected to undertake key aspects of maintenance and deployment work on Servers, network appliance, cabling and datacenter projects.

- Project and Request Management – process, coordinate and support tickets as per agreed service levels for both scheduled and unscheduled support request.
- Communicate and interface with suppliers, multi-cultural system administrators, clients and other groups representing the designated operation site.
- Install, move, add, and change server and other hardware in data center according to requests.
- Hardware: e.g. troubleshooting of hardware, labeling, root cause analysis, trend analysis, break/fix, smart hands, firmware upgrades.

- Network connectivity support: e.g. voice, network, circuit and including cable management
 - Deployment support: e.g. supervision & installation of construction work, cabling, power, rack/un-rack, server kitting, diagnostic, OS build and support
 - Media operation support: e.g. mount/un-mount medias and support Librarians.
 - Asset and Capacity Management - Asset including stocks management: e.g. spare parts, cable, kits, inventory/gap analysis report
 - Site logistics support: e.g. receiving, storing, shipping and disposal of equipment.
 - Maintain and monitor performance and service levels of all the support systems.
 - Ensure regular reporting to management regarding performance and service levels.
 - Attending meetings required by operation.
 - Comply and enforce internal policies, processes and standards.
 - Create, maintain updates and publish process & procedural documents.
 - Contribute to project and program activities as necessary.
 - Continuity of Business preparation and support: e.g. power-down event, COB drills, adequate staffing during staff illness/vacation.
 - Conduct necessary training of new staff.
-

スキル・資格
