日本での就労許可が必要です

### 募集要項

#### Summary

Randstad is partnered with a global insurance firm, in their search for a "Full Stack Developer" for their Systems Engineering team. The team will lead the effort on developing a strategy to exit multiple existing applications on the mainframe environment, building new cloud-ready applications in an open source environment. Your role as a full-stack developer will be to support the design, development, and deployment of web apps, mobile apps, and API of a prototype application to be utilized as a Proof of Concept for the future migration of existing applications. You will participate in each stage of development to ensure a successful delivery, including driving the solution design, implement, testing, and supporting the deployment into production.

#### Responsibilities

- Implement, test, deploy, maintain, and troubleshoot core business applications, including API & DB, optionally UI, API integration and mobile development
- Meet and coordinate with internal and external stakeholders to establish project scope, system goals, and requirements
- Ensure code quality of development by regularly performing code reviews to follow best practices
- Create deployment procedures, monitor systems health, gather system statistics, and troubleshoot reported errors and alarms
- Implement best practices for scalability, reliability, maintainability, and performance

---

## スキル・資格
