### 募集要項

#### Role:

You will be part of an innovative team developing cutting-edge internal solutions that empower our sales and business operations across the organization. Your contributions will directly impact our growth and success.

#### Responsibilities:

- Design and implement robust Authentication and Authorization solutions for both internal and external applications.

- Collaborate closely with diverse departments to transform business needs into effective technological solutions.
- Integrate multiple applications into a seamless internal customer management platform.

Selling points:

- Play a crucial role in enhancing our business infrastructure, ensuring it scales in line with our ambitious growth trajectory.
  - Enjoy the autonomy to influence and decide how to approach and implement new solutions and features.
  - Work with a group of driven engineers across multiple disciplines to achieve our goal of a learning world.
  - Engage with a variety of talented individuals from diverse backgrounds, fostering a rich and inclusive work culture.
- 

## スキル・資格

Minimum Qualifications:

- 2+ years of experience as a software engineer
- Experience building SaaS applications
- Experience working with git
- Experience in designing and developing microservices
- Experience working with Linux based systems
- Experience in software development for internal use (requirement gathering, designing, programming and maintenance)
- Preferred technical skills: golang, gRPC, protobuf, javascript, react, postgres, docker
- Experience in working in a team loosely following agile methodology
- Ability to communicate in English

Preferred Qualifications:

- Experience with security or penetration testing of software applications.
  - Experience managing CI/CD pipelines
  - Ability to communicate in Japanese
  - 5+ years of golang experience a plus
-
