募集要項

Our client is looking for a highly experienced and **technically proficient Senior Full Stack Engineer** with leadership capabilities, particularly in **IBM Mainframe (MF) environments**. Here's what the ideal candidate would look like:

Technical Expertise

- **Strong IBM Mainframe (MF) knowledge** – The role involves leading a **system migration** and transitioning applications running on **IBM MF**.
- **Mainframe Modernization Experience** – Since the project includes migrating applications from **IBM MF**, they need someone experienced with **legacy system modernization** and possibly **cloud migration or distributed systems**.
- **Full Stack Development Skills** – While the focus is on IBM MF, the candidate should have **broad development skills**, likely involving **COBOL, JCL, DB2, and modern full-stack technologies**.
- **Application & System Migration** – The candidate must have experience in **migrating enterprise applications** and dealing with **system dependencies (Billing, Claims, Front-End, etc.)**.

Leadership & Delivery Management

- **Primary Delivery Lead** – The candidate must have **strong project management and coordination skills** to ensure the **migration project** is delivered **on time and within scope** .
- **Building and Managing Teams** – After launch, they will **build and manage the IBM MF team** , requiring **team leadership, hiring, and mentoring experience** .
- **Cross-Domain Collaboration** – The role requires working with multiple domains (**Billing, Claims, Front-End, etc.**), so the candidate needs **excellent stakeholder management and cross-functional collaboration skills** .

スキル・資格

Soft Skills & Business Acumen

- **Strategic Thinker** – Since this is a **major migration project**, the candidate must understand **business impacts, risk management, and long-term tech strategy** .
- **Problem-Solving & Adaptability** – Leading IBM MF migration will come with **technical and organizational challenges** .
- **Strong Communication Skills** – They need to **work across teams**, explain **technical decisions**, and **align stakeholders** .

Overall Candidate Profile

- **Experienced IBM Mainframe Engineer** (COBOL, DB2, JCL, CICS).
- **Proven track record in system/application migration & modernization** .
- **Strong leadership and team management experience** .
- **Ability to manage cross-domain collaboration (Billing, Claims, etc.)**.
- **Delivery-focused with excellent problem-solving and strategic thinking** .

Our client is looking for **someone with 10+ years of experience in IBM MF systems and enterprise-level migrations**. A candidate with **both hands-on technical skills and leadership capabilities** will be a strong fit.
