**募集要項****1.) About the company**

A Global Online Travel & Tourism company is seeking to expand its international team in Tokyo. They offer a travel booking platform that allows users to search and book economical flights, accommodations and reserve taxis.

Established over 20 years ago, their application has over 20 million downloads which led to their expansion opening 6 international subsidiaries world-wide. In 2023, they reached their highest profit margins - leading to 3 new services being released.

They are seeking Frontend Developers, to work on their main service - the travel booking platform. You will work closely with other engineers to design, implement, and test new features, while also ensuring the stability and performance of existing systems.

2.) Who Are you

You are an experienced Frontend Engineer.  
You are a self-motivated individual that enjoys working in a team.  
You are interested in the tourism industry, and how it can help the Japanese society.  
You like to follow and verify the latest theories and case studies.  
You are able to interview and work in Japanese.

3.) Why you should apply

Experienced leadership - from Amazon, Accenture, Salesforce  
Global Environment - Over 50% of the company are international employees.  
Engage in challenging projects that play a crucial role in the success of the organization.  
Hybrid Workstyle
