募集要項

Help drive the transition to clean energy by managing solar development projects across Japan, from land negotiation to permitting and RTB stage. Use your local knowledge and project management skills to make a tangible impact in the renewables sector.

Client Details

Our client is a fast-growing renewable energy company with a strong track record in utility-scale solar development. With headquarters in Europe and an expanding presence in Japan, they are dedicated to delivering high-quality solar projects with a local-first approach. Their Tokyo-based team values collaboration, innovation, and sustainable growth.

Description

- Originate new development opportunities and assess site feasibility, including environmental and grid connection considerations
- Negotiate land lease or purchase agreements with landowners under favorable conditions
- Engage with neighbors and local associations to secure consent and support
- Manage permitting processes across local, prefectural, and across the country
- Coordinate with subcontractors to complete surveys, FDP, EIA, and other permit-related work

- Develop project budgets and financial models to ensure cost-effective execution
- Collaborate closely with the technical team to ensure project feasibility and alignment with technical requirements
- Bring projects to Ready to Build (RTB) status within expected timelines
- Stay informed on solar technology trends and regulatory developments

Job Offer

- Competitive salary and performance-based bonuses
- Opportunity to be part of a mission-driven company contributing to Japan's energy transition
- International work environment with a flat structure and strong growth trajectory
- Hands-on role with high autonomy and visible impact

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Rim Silini on +81364021593.

スキル・資格

- Project development experience, preferably in renewable energy (solar focus a plus)
- Strong understanding of Japanese permitting processes and METI procedures
- Experience negotiating with landowners and coordinating with local authorities
- Proven ability to manage multiple projects and collaborate across teams
- Driver's license required
- Japanese and business-level English
- Strong financial acumen, including project budgeting and modeling skills
