募集要項

One of our clients that specializing public vehicle manufacturing that based in Klang is looking for experience talent Supply Chain Manager . This role will report directly to Procurement Director based in HQ (United Kingdom) . This role is crucial as play a vital role to handle local and overseas supplier in order to optimize supply chain operations. The role also includes strategic planning, process optimization, supplier management, and risk mitigation to achieve operational excellence and meet business objectives.

Responsibilities:

- Develop and implement supply chain strategies, policies, and procedures to optimize efficiency, reduce costs, and enhance performance throughout the supply chain network.
- Collaborate with internal stakeholders, including procurement, production, sales, and finance teams, to align supply chain activities with business objectives, demand forecasts, and production schedules.
- Manage supplier relationships and vendor contracts, negotiating terms, pricing, and service agreements to ensure

cost-effective procurement of goods and services.

- Source and select suppliers, conducting supplier evaluations, audits, and performance reviews to assess reliability, quality, and compliance with contractual requirements.
- Monitor and analyze supply chain performance metrics, such as inventory turnover, on-time delivery, fill rates, and lead times, identifying opportunities for improvement and implementing corrective actions.
- Optimize inventory management processes, including demand planning, inventory control, and stock replenishment, to minimize stockouts, excess inventory, and carrying costs.
- Coordinate transportation and logistics activities, including freight forwarding, warehousing, and distribution, to ensure timely and cost-effective delivery of goods to customers and distribution centers.
- Implement supply chain risk management strategies, assessing potential risks, vulnerabilities, and disruptions, and developing contingency plans to mitigate supply chain disruptions.
- Evaluate and recommend supply chain technologies and systems, such as ERP (Enterprise Resource Planning) software, WMS (Warehouse Management System), and TMS (Transportation Management System), to streamline operations and improve visibility.
- Lead cross-functional teams and supply chain projects, driving process improvements, system implementations, and change management initiatives to enhance supply chain capabilities and performance.
- Ensure compliance with regulatory requirements, import/export regulations, and customs procedures related to supply chain operations, maintaining documentation and records as necessary.
- Provide leadership and mentorship to supply chain staff, fostering a culture of continuous learning, development, and collaboration within the team.
- Analyze market trends, industry developments, and emerging technologies in supply chain management, staying updated on best practices and innovations to drive continuous improvement.
- Communicate supply chain goals, objectives, and performance metrics to senior management and key stakeholders, presenting regular updates, reports, and recommendations.
- Drive sustainability and corporate social responsibility initiatives within the supply chain, promoting ethical sourcing, environmental stewardship, and social responsibility practices.
-

Requirements and Qualifications:

- Bachelor's degree in supply chain management, logistics, business administration, or a related field; master's degree or professional certification (e.g., CSCP, CPIM) is a plus.
- Proven experience in supply chain management, logistics, procurement, or operations management, with a track record of success in optimizing supply chain processes and driving operational improvements.
- Strong analytical and problem-solving skills, with the ability to analyze complex data, identify trends, and develop actionable insights and recommendations.
- Excellent communication and interpersonal skills, with the ability to collaborate effectively with cross-functional teams, suppliers, and customers.
- Strategic thinking and planning abilities, with a focus on long-term vision, goal setting, and execution of supply chain strategies to achieve business objectives.
- Proficiency in supply chain management software and systems, such as ERP, WMS, TMS, and demand planning tools, to manage and optimize supply chain operations.
- Knowledge of supply chain principles, best practices, and industry standards, including inventory management, procurement strategies, and transportation logistics.
- Leadership and team management skills, with the ability to motivate, inspire, and develop a high-performing team to achieve supply chain goals and objectives.
- Ability to multitask, prioritize tasks, and manage competing priorities in a fast-paced, dynamic environment with tight deadlines and changing priorities.
- Commitment to continuous improvement, innovation, and excellence in supply chain management practices, with a focus on driving operational efficiency and customer satisfaction.

Required Skills:

- Supply chain management

- Strategic planning
- Vendor management
- Data analysis
- Communication skills
- Problem-solving
- Leadership
- Process optimization
- Project management
- Cross-functional collaboration
