募集要項

COMPANY OVERVIEW
A well-established client of us in Kuala Lumpur is seeking for Site Reliability Engineering Lead.

JOB RESPONSIBILITIES

1. Team Leadership:

○   Lead and mentor a team of SREs, fostering a culture of ownership, collaboration, and continuous improvement.

○   Define clear goals, performance metrics, and development plans for the team.

1. System Reliability & Performance:

○   Design and implement strategies to improve system reliability, scalability, and performance.

- Conduct root cause analysis of production incidents and develop preventive solutions.

  1. Infrastructure Management:

- Oversee the deployment, monitoring, and management of production environments.

- Collaborate with development teams to design cloud-native infrastructure and architecture.

  1. Automation & CI/CD:

- Drive automation of operational processes, reducing manual intervention and response times.

- Optimize CI/CD pipelines to ensure smooth and rapid deployments.

  1. Incident Management:

- Establish incident response protocols and lead efforts during major incidents.

- Ensure robust monitoring and alerting systems are in place to proactively detect issues.

  1. Collaboration & Communication:

- Act as a liaison between engineering, operations, and other teams to align objectives.

- Share insights and best practices with internal stakeholders to enhance overall system resilience.

JOB REQUIREMENTS

  1. Technical Expertise:

- Strong experience with cloud platforms (AWS, Azure, Google Cloud) and infrastructure-as-code tools (Terraform, Ansible, etc.).

- Proficiency in programming/scripting languages (Python, Go, Shell, etc.).

- Deep knowledge of Kubernetes, containerization, and distributed systems.

  1. Leadership Skills:

- Proven track record of leading SRE or DevOps teams and managing large-scale production environments.

- Strong decision-making, prioritization, and problem-solving capabilities.

  1. Monitoring & Metrics:

- Expertise in implementing and using monitoring tools (Prometheus, Grafana, Datadog, etc.) and logging systems.

- Familiarity with service-level objectives (SLOs), service-level agreements (SLAs), and error budgets.

  1. Soft Skills:
  2. Experience:

- Excellent communication and collaboration skills to work across cross-functional teams.

- Ability to mentor and upskill team members, fostering a learning-oriented culture.

- At least 8 years of experience in SRE, DevOps, or related roles with a focus on reliability engineering
