募集要項

Job Responsibilities:

- Develop, implement, and support logistics software for company, mainly serving our APAC group companies.
- Participate in all project phases, from requirements gathering to implementation, maintenance, and support for logistics applications (VB.Net/Java).
- Ensure deliverables meet expectations, quality standards, and schedules.
- Maintain applications according to SLAs, solve performance issues, and fix bugs.
- Engage in continuous integration and automation for testing and deployment.
- Document and maintain design specifications, source code, and archives.
- Commit to improving company methodology and delivery.

- Provide technical guidance and lead team members.
- Collaborate with stakeholders to gather and refine project requirements.
- Conduct code reviews to ensure quality and standards adherence.
- Explore and implement new technologies to enhance development efficiency.
- Stay updated with trends and technologies in software development.

Job Requirements:

- Bachelor's, Professional, or Master's degree in Computer Science, Information Technology, or a related field.
- Experience: 5-7+ years in full-cycle software development project management.
- Knowledge of AngularJS, Bootstrap, Ionic Framework, etc.
- Familiarity with programming languages in both VB.Net, Java.
- Experience with Oracle, MySQL, or other relational databases.
- Understanding of RESTful APIs, SOAP, OAuth, etc.
- Proficient with Git, Visual Studio, Eclipse, etc.
- Skilled in database design and development.
- Excellent communication skills.
- Motivated, quick learner, passionate about new technologies, detail-oriented, and strong problem-solving skills.
- Capable of mentoring and leading a team, while being a team player.
- Preferred Experience in development for logistics or supply chain management software.
- Familiarity with Agile development methodologies.
