募集要項

Key Responsibilities:

- Apply analytics to solve real-world business problems across various departments.
- Work alongside business engagement managers to understand departmental needs and deliver optimal analytics solutions.
- Develop and implement analytical models tailored to complex business requirements.

Analytics will include:

- **Exploratory Data Analysis** (e.g., correlation analysis)
- **Prediction** (e.g., sales forecasting, demand forecasting, visitor forecasting)

- **Classification** (e.g., customer segmentation, product categorization)
- **Effectiveness measurement** (e.g., impact analysis of business initiatives)
- Collect, clean, and preprocess data; perform feature engineering relevant to analysis.
- Contribute to other related tasks as needed.

スキル・資格

Required Qualifications:

- 2+ years of hands-on experience as a Data Analyst.
- Experience in building statistical models.
- Strong data visualization skills.
- Excellent communication skills to bridge the gap between business needs and analytical constraints.
- Native-level proficiency in Japanese.

Preferred Qualifications:

- Proficiency in SQL, R, and/or Python.
- Experience working with large-scale datasets.
- Practical experience in machine learning model development.
- Experience in developing deep learning applications.
- Academic background in Information Engineering, Computer Science, Physics, Mathematics, or Industrial Engineering (Bachelor's, Master's, or PhD).
- Publications in international journals or conferences.
- Patent ownership.
- Practical experience in the retail industry.
- Business-level proficiency in English and/or Chinese
