募集要項

Planning and leading development, operation and maintenance based on the business plan

Improvement of company-wide code base and development process

Development management for large-scale projects (one to several years)

Develop and lead the development, operation and maintenance based on the business plan.

スキル・資格

Required Skills

5+ years of experience in system development, operation, and maintenance

More than 1 year of experience in architecting

Welcomed skill set includes

3+ years of experience as a tech lead or engineering manager

The kind of person we are looking for

We are looking for someone who shares our company's values.

Highly motivated to learn and constantly absorbing technology and knowledge.

People who enjoy working in a fast-paced environment and dynamic change.

Those who can work through trial-and-error, focusing on problem-solving and not on means to an end.

Have a deep understanding of the business domain and a sincere attitude to accept feedback from users and customers.

Those who are able to identify and set appropriate issues on their own and work with others to resolve them.
