募集要項

We're on the lookout for a Senior BI Developer who excels at transforming complex datasets into strategic insights. If you're experienced in data visualization, business reporting, and enjoy solving problems through analytics, this role is for you.

Responsibilities

- Build and manage interactive dashboards and data reports using Power BI to support business strategy.
- Interpret stakeholder requirements and turn them into effective data solutions.
- Apply SQL and DAX techniques to process, analyze, and visualize data efficiently.
- Define and track key business metrics and performance indicators.
- Lead the development of data pipelines and contribute to improvements in reporting systems.

Qualifications:

- Bachelor's degree in Information Systems, Computer Science, Business Analytics, Engineering, or a related field.
- 3+ years of hands-on experience in BI or data analysis roles.

- Strong expertise in Power BI and SQL; familiarity with data modeling and ETL tools is a plus.
- Analytical mindset with a keen eye for detail and a structured approach to problem-solving.
- Proficient in both English and Thai communication, both written and spoken

Interested candidate, please submit your most recent resume in English (Word format) by simply clicking "APPLY NOW"
