募集要項

We are looking for a dynamic and visionary leader to join our client team as the Senior Data Scientist.

Responsibility:

- Lead and expand our IT team, including developers, BI developers, and data analysts.
- Develop and implement a comprehensive data and IT strategy that aligns with our company's goals.
- Collaborate with executives and stakeholders to leverage data for innovative business solutions.
- Oversee the design and maintenance of our centralized data system, ensuring stability, scalability, and security.
- Drive the development and deployment of AI and machine learning models to address business challenges.

- Manage and inspire the IT team to create robust IT solutions and foster a collaborative environment.
- Plan and execute data and IT projects, ensuring timely and budget-friendly delivery.
- Promote a culture of data-driven decision-making through regular updates and data literacy initiatives.

Qualification:

- Bachelor's in Data science, Computer Science, Statistics, or related fields.
- 3+ years of experience in data science, specializing in tasks like data cleansing, predictive modeling, and optimization.
- Demonstrated ability to lead and manage teams in data science and IT environments.
- Proficient in database management, data processing, analytics, IT development, and skilled in AI and machine learning.
- Proficient in both English and Thai.
