募集要項

- **Industry:** Financial Industry

- **Location:** Bangkok (Hybrid working)

Responsibility:

- **- Automate using Ansible Automation Platform (AAP)** : Migrate, develop, and maintain Ansible playbooks and CI/CD pipelines.

- **- Implement pipelines**: Create automated pipelines for traditional and containerized applications, replacing manual processes with 3rd party APIs.

- **- Promote CI/CD best practices**: Guide teams in adopting CI/CD concepts by collecting requirements and implementing relevant automation.

- **- Provide level 2 support**: Manage incidents and problems on automation platforms.

- **- Maintain automation platforms**: Ensure platforms are up to date and functioning smoothly.

Qualifications:

- - Bachelor's Degree in Computer Science/Engineering or equivalent experience, with at least 5 years in a similar position.

- - Strong automation skills, experience with Linux (Red Hat) environments, and Openshift Platform API usage.

- - Enthusiastic coaching, continuous improvement mindset, problem-solving attitude, reactivity, proactivity, discipline, and strong team spirit.

- - Well spoken in English with strong communication skills.

- **-** On-call standby required (nights/weekends).
