募集要項

COMPANY OVERVIEW

A well-established client of us in Kuala Lumpur is seeking for Site Reliability Engineering Lead.

JOB RESPONSIBILITIES

1. Team Leadership:

- Lead and mentor a team of SREs, fostering a culture of ownership, collaboration, and continuous improvement.
- Define clear goals, performance metrics, and development plans for the team.

1. System Reliability & Performance:

- Design and implement strategies to improve system reliability, scalability, and performance.

- Conduct root cause analysis of production incidents and develop preventive solutions.
- 1. Infrastructure Management:
 - Oversee the deployment, monitoring, and management of production environments.
 - Collaborate with development teams to design cloud-native infrastructure and architecture.
- 1. Automation & CI/CD:
 - Drive automation of operational processes, reducing manual intervention and response times.
 - Optimize CI/CD pipelines to ensure smooth and rapid deployments.
- 1. Incident Management:
 - Establish incident response protocols and lead efforts during major incidents.
 - Ensure robust monitoring and alerting systems are in place to proactively detect issues.
- 1. Collaboration & Communication:
 - Act as a liaison between engineering, operations, and other teams to align objectives.
 - Share insights and best practices with internal stakeholders to enhance overall system resilience.

JOB REQUIREMENTS

- 1. Technical Expertise:
 - Strong experience with cloud platforms (AWS, Azure, Google Cloud) and infrastructure-as-code tools (Terraform, Ansible, etc.).
 - Proficiency in programming/scripting languages (Python, Go, Shell, etc.).
 - Deep knowledge of Kubernetes, containerization, and distributed systems.
- 1. Leadership Skills:
 - Proven track record of leading SRE or DevOps teams and managing large-scale production environments.
 - Strong decision-making, prioritization, and problem-solving capabilities.
- 1. Monitoring & Metrics:
 - Expertise in implementing and using monitoring tools (Prometheus, Grafana, Datadog, etc.) and logging systems.
 - Familiarity with service-level objectives (SLOs), service-level agreements (SLAs), and error budgets.
- 1. Soft Skills:
 - 2. Experience:
 - Excellent communication and collaboration skills to work across cross-functional teams.
 - Ability to mentor and upskill team members, fostering a learning-oriented culture.
 - At least 8 years of experience in SRE, DevOps, or related roles with a focus on reliability engineering
