募集要項

The company is a rapidly growing company addressing one of the most pressing challenges of the 21st century: the global water crisis. Its mission is to transform water infrastructure through innovative, small-scale decentralized water recycling systems—particularly suited for disaster response and water-scarce regions.

Over the past few years, the company has expanded its global presence, attracting top-tier engineers and researchers from around the world. Its groundbreaking technology has been showcased at international climate conferences such as COP28 and received recognition through major global awards, including a prestigious environmental prize founded by Prince William. Now entering a significant growth phase with a path toward IPO, the company is seeking passionate and driven individuals to help scale this world-first solution.

As a member of the production control team, you will oversee and optimize **QCD (Quality, Cost, Delivery)** across mass production.

Responsibilities include:

- Production planning and control for company's product development projects
 - Production capacity management, cost control, and inventory/delivery tracking
 - Managing manufacturing processes in coordination with subcontractors
-

スキル・資格

- At least 5 years of experience in production control within a manufacturing company
-
