募集要項

[Company Overview]
Since their founding, they have grown by being involved in many innovations using the Internet, with a focus on web development.
In recent years, the spread of Salesforce has boosted their performance in the implementation consulting business.
They have also deployed their technology to Asian countries using Chinese.

In the future, they will continue to contribute to business support in China and other Asian countries, while making the most of their AI know-how, promoting their own AI platform, and constantly evolving with the times.

[Attractiveness of the Company/Job]
The organization is based on people who graduated from major universities in China, and even now, more than half of their engineers are from China.

The appeal is that by working on projects with these enthusiastic students, you can grow into a global talent.

The average age is 28, the employees get along well with each other, and they have an environment where young

employees can work freely.

The labor environment is also well-maintained, with more than 127 days of annual holidays and reduced overtime hours, and they are working to improve paid leave utilization rates.

One of their company's distinctive features is its homely corporate culture, where employees' families also enjoy events such as company trips and barbecues.
They also actively support their employees' career advancement by holding monthly in-house study sessions and providing support for obtaining qualifications.

*This position is available only for people residing in Japan
【Job description】
As a systems engineer, you will be developing web, iOS, and android apps in-house.
Depending on your experience, you will be in charge of web, iOS, etc. projects.
Projects will be both in-house products and contract development, and you will be responsible for all processes.

90% of their clients are Japanese corporations, so Japanese language skills are required, but we also hold Japanese language study sessions in-house.

[Requirements]
・Over 3 years of development experience as a Web, iOS, or Android engineer
・New graduates and second-time graduates are also welcome to apply with university research.
・For new graduates and second year graduates, those with programming experience in IT or science and engineering fields.
・Japanese ability: Business level or above
