## 募集要項

You will manage the strategy, development, and operations for a consumer-facing web product supporting a high-volume loyalty platform. The role involves requirement gathering, stakeholder coordination, and execution of product roadmaps in an agile environment.

## Client Details

The client operates one of Japan's largest digital ecosystems, offering integrated services across e-commerce, finance, and media. Their loyalty platform supports massive real-time transactions and is a key engagement tool used by millions of consumers. The team maintains a fast-paced, agile development culture with a strong emphasis on cross-functional collaboration and global communication.

## Description

- Define product vision and roadmap based on business goals and customer needs.
- Prioritize features and coordinate with stakeholders across departments.

- Translate business requirements into clear documentation and user stories.
- Collaborate with engineering and SRE teams to deliver and support features.
- Track project progress, manage risks, and ensure post-release follow-through.

### Job Offer

- Long-term renewable haken contract
- Potential to convert to permanent employee in the future
- Competitive salary
- Attractive benefits
- International work environment
- Work hours: 9:00-17:30, Monday to Friday

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

---

### スキル・資格

- Proven experience in product or project management roles.
- Business-level English communication
- Technical literacy (e.g., Java, Python, React) and SDLC knowledge.
- Understanding of system architecture and cloud infrastructure.
- Strong communication and stakeholder management skills.

---
