日本での就労許可が必要です

### 募集要項

Join a forward-thinking DevOps team building the cloud infrastructure behind a powerful no-code AI development platform. Designed for real-time collaboration and complex data workflows, the platform is central to the company's next wave of innovation.

As DevOps Lead, you'll take ownership of infrastructure automation, CI/CD, and cloud architecture—enabling faster deployments, higher availability, and smoother collaboration across engineering and business teams.

#### Responsibilities will include:

- Design and automate cloud infrastructure for a large-scale AI-powered development platform
- Build and maintain CI/CD pipelines to support fast and reliable releases
- Develop internal tools and technical standards that empower product and engineering teams

- Lead cross-functional initiatives, coordinating efforts across product, engineering, and operations

**What's on offer:**

- Salary in the range of 7M to 10M JPY, depending on skills and experience
  - Contribute to a mission-critical AI platform positioned as a major pillar of future business growth
  - Modern stack & cloud focus- work with AWS, Kubernetes, and infrastructure-as-code tools in a technically advanced environment
  - Career growth – a visible role where your work impacts both product delivery and platform stability
  - International collaboration- join a diverse, English-speaking engineering team with global perspectives
  - Hybrid work style (1 day per week at the office), Flextime policy
- 

**スキル・資格****Required Skills and Experience:**

- 3+ years of experience in DevOps, SRE, Cloud Infrastructure, or related roles
- Hands-on experience automating infrastructure on Azure
- Proficiency with Kubernetes container orchestration
- Proficiency with infrastructure-as-code tools such as Terraform, Packer, or Chef
- Strong understanding of CI/CD, source control, and configuration management
- Familiarity with web service development and deployment

**Desired Skills and Experience:**

- Experience working with AWS or Google Cloud Platform
- Previous technical leadership or team lead experience

**Language Skills:**

- Business-level Japanese (N2 or above) and Conversational English are required for this role
-
