### 募集要項

Location: Cyberjaya, Selangor (hybrid working)

The primary responsibility of the Solution Architect (Japanese-speaking) is to consult with the client and work with internal teams to create strategies, transformational designs and the architectural vision for more complex solutions that address the clients' needs. They provide multi-technology consulting services on all aspects of IT Infrastructure, Cloud and Security related components.

### Roles and Responsibilities:

- Contributes to the development of complex solution architectures in specific business, infrastructure or functional areas.
- Identifies and evaluates alternative architectures and the trade-offs in cost, performance and scalability.
- Produces specifications of cloud-based or on-premises components, tiers and interfaces, for translation into detailed designs using selected services and products.
- Supports a change programme or project through the preparation of technical plans and application of design principles that comply with enterprise and solution architecture standards.
- Accountable for understanding client requirements, collecting data, delivering analysis and problem resolution.
- Monitors the external environment to gather intelligence on emerging technologies.
- Creates reports and technology roadmaps and shares knowledge and insights with others.
- Designs components using appropriate modelling techniques following agreed architectures, design standards, patterns and methodology.
- Creates multiple design views to address the concerns of the different stakeholders of the architecture and to handle both functional and non-functional requirements, including proof of concept (POC).
- Reviews, verifies and improves own designs against specifications.
- Makes recommendations for the development of new go to market services and contributes knowledge on relevant verticals.
- Operate across both the technical levels within the enterprise architecture and the value chain to develop holistic and integrated solutions.

#### Salary:

Monthly JPY 500K - JPY 700K /RM 15,000-RM 20,000 (based on experience & skillsets)

#### Additional Information

■ Working arrangement: Hybrid working (WFO + WFH)

#### ■リロケーション・サポート／Relocation Support

- ・労働許可（ワークパミット）取得
- ・片道航空券
- ・10日間の宿泊提供
- Employment Pass & work visa sponsorship
- One-way flight ticket
- Temporary accommodation for 10 days
- Tax briefing/ consultation

★成長とキャリアアップの機会：年齢や性別に関係なく、努力次第でキャリア・アップを目指せます。

#### 【企業の特徴】

多文化の環境での働きやすさ：マレーシアは多民族・多文化が共存する国で、英語が共通語です。  
安定した企業基盤：長期にわたり安定した経営を続けています。

#### 【なぜNTTなのか？】

日本人スタッフによる経験豊富なサポート：海外就職や移住に不安を感じる方も安心してご応募ください。

#### スキル・資格

- Advanced professional IT technical experience within a large scale (preferably multi- national) technology services environment on the following areas: Network (LAN/WAN), Server implementation, Cloud migration, Security consulting, and Documentation (Solution Design, High Level Design, Low Level Design, and Migration planning etc)
- Language requirements: For non-native (local / Japanese-speaking candidates): Japanese Language Proficiency Test (JLPT) minimum N2 level. For Japanese natives: business level English is required for managing clients based in APAC and Japan
- Project or Program Management experience would be preferred but not essential
- Advanced client engagement and consulting experience coupled with solid experience in client needs assessment and change management
- Advanced experience in integrating the solution for the particular project with the business domain, enterprise concerns, industry standards, established patterns and best practices
- Experience working in an agile development environment

#### Knowledge, Skills and Attributes:

- Extensive knowledge of multi-vendor service integrations and cross-functional solutions and infrastructure designs
- Excellent communication skills both verbal and written
- Specialist knowledge on how specific infrastructures and securities are deployed in line with relevant methodologies and frameworks
- Ability to develop and leverage their specialist knowledge of reference architectures
- Ability to maintain knowledge of trends and development in technology domains

#### Certifications (good-to-have):

- Certification and working knowledge of Enterprise Architecture methodologies (e.g. CCNP, CCIE, ITIL, etc)
- Network, Server, Cloud (Azure), and Security related certifications are preferred
