募集要項

Logistics Specialist

A global leader in the energy and infrastructure sector is seeking an experienced logistics and transportation professional to support project-based supply chain operations. This role involves planning, optimizing, and coordinating domestic and international logistics, including customs compliance and sustainability initiatives.

Key Responsibilities:

- Improve and manage logistics processes, tools, and master data
- Plan transportation schedules aligned with project timelines and customer needs
- Optimize routes and transport modes using TMS and other tools

- Coordinate with warehouses and internal teams for timely deliveries
 - Manage and evaluate 3PLs, freight forwarders, and transport vendors
 - Handle contract negotiation, fleet utilization, and delivery performance
 - Promote and implement low-carbon logistics solutions
 - Oversee shipments (air, sea, truck, rail) and manage real-time updates
 - Respond to delays or risks with proactive adjustments
 - Ensure compliance with trade regulations and prepare customs documents
 - Use FTAs and optimize Incoterms to reduce duties and lead times
 - Monitor KPIs on cost, timeliness, and environmental impact
 - Support cost reduction initiatives and green logistics planning
-

スキル・資格

Requirements:

- Bachelor's degree
 - 3+ years in supply chain/logistics operations
 - Strong negotiation and coordination skills
 - Familiar with logistics cost control and project workflows
 - Proficient in WMS, TMS or ERP (e.g., SAP), Excel, and PowerPoint
 - Understanding of green logistics and sustainability practices
 - Business-level Japanese (JLPT N1) (for negotiation and documentation)
 - Business English (TOEIC 700+)
-
