募集要項

Incorporated in February 1996, this Japanese organization specializes in generating renewable energy. The company provides a diverse range of products, including drives, inverters, semiconductor devices, sensors, transmission systems, factory automation solutions, and equipment upgrade services.

Responsibilities:

- Propose effective solutions based on diagnostic findings.
- Perform routine servicing, troubleshooting, and commissioning tasks.

- Attend site meetings and provide necessary clarifications.
 - Offer technical support and training to customers.
 - Prepare detailed service reports and documentation.
 - Travel to various sites to provide product support.
-
- Participate in team meetings and facilitate cross-department communication.
-
- Ensure smooth project deliveries.
 - Adhere to OSHA safety standards.
 - Conduct onsite and online troubleshooting for company's products.

Job Requirements:

- Proficiency in English and Malay (Mandarin is an advantage).
 - Degree in Electrical & Electronic Engineering or a related field.
 - 1-2 years of experience (service engineering experience is a plus).
-
- Proficient in reading engineering drawings, wiring, and using measuring and analysis equipment.
-
- Strong understanding of safety standards and practices.
-
- Excellent troubleshooting and problem-solving skills for complex technical issue.
-
- Proactive, self-motivated, and able to work independently under pressure and meet deadlines.
-
- Strong communication and interpersonal skills to effectively engage with clients.
-
- Valid driver's license and willingness to travel to client sites.
