募集要項

Join a well-established global sport & outdoor retail brand's IT team to lead business application projects. This role focuses on working with internal users and vendors in Japan to improve backend systems for functions such as e-commerce, order management, and inventory.

Client Details

Our client is a well-established US-base sportswear company with a robust digital transformation roadmap. Their Japan headquarters hosts approximately 180 employees and offers a supportive and multicultural environment. Known for its strong sales in Japan, they provide hybrid work flexibility and exclusive benefits, including employee discounts and refresh holidays.

Description

- Lead system enhancement and integration projects across ERP, finance, and SCM systems.
- Collaborate with internal users and vendors to analyze, improve, and maintain application performance.

- Create and manage system interfaces, monitor application KPIs, and document processes.
- Support ERP transition efforts, focusing on data integration and automation with RPA and BI tools.
- Provide technical guidance and training to non-technical business users.

Job Offer

- Annual salary: up to ¥8M (Staff level)
- Hybrid work model (3 office days in Shinjuku / 2 WFH)
- Flexible hours with minimal overtime (except during busy IT phrases)
- Exclusive employee discounts + additional perks at employee stores
- Refresh holidays + generous leave policy
- Full social insurance coverage

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Mana Chuabangon +81 3 6627 6080.

スキル・資格

- 3+ years of experience as a tech lead/engineer on application projects (including vendor management).
- Experience in business system development and maintenance.
- Strong knowledge of SQL, databases, and general application architecture.
- Japanese fluency (N1 level)
- Experience in retail business systems (eCommerce, POS, CRM) is a plus.
