募集要項

【About the Company】

It is a leading company in the IT, DX, advertising, consulting, marketing, data science, travel and tourism industries,

contributing to top market share, global and Japanese economic development and regional revitalization.

■ebica Business
ebica is developing vertical SaaS in the field of "food," which is the foundation of tourism. Gains top market share and continues to provide new value while leveraging big data.
Collaborating with various companies that lead Japan. They are contributing to society by utilizing the latest technology in the world of data science.

■Japanticket Business
They are promoting EC in various areas such as tourism [food, leisure, apparel, department stores, amusement, hotels, music, animation, manga, entertainment, environment, culture, mobility, local governments, public offices and ministries] so that we can provide services as an infrastructure for promoting Japan as a tourism nation.
They are delivering the charm of the region and Japan to the world.

■New Business
They are developing new businesses to boost gastronomy tourism in Japan by maximizing the synergy effects of "ebica business" and "Japanticket business."
Currently undisclosed.

【About the Job...】

"ebica," a reservation management system for restaurants, is the industry's first 'gourmet site controller' function that automates all online reservation management, aiming to maximize the number of reservations by fully publishing inventory (seats available for reservation) on various gourmet sites without the worry of double booking.

Under the support of the manager/leader in charge, you will be responsible for the following tasks in cooperation with the director (for areas in which you have no experience, the manager will work with you).
・Basic and detailed system design
・Propose system improvements
・Development of Web API and batch processing
・AWS infrastructure construction using Terraform
・Code review
・Refactoring for functional improvement, architecture change, etc.
・Creation of various design documents as needed

【Development Environment】
Development Flow
・Spiral model / Agile development (We plan to shift to Agile development)
・Pull Request based development using GitHub
・Ticket-based development using Backlog

Languages
・Backend: Golang / Kotlin
・Front-end: Vue.js / Nuxt.js

Infrastructure
・AWS: RDS (PostgreSQL) / DynamoDB / ALB / ECS / Fargate / CodeBuild / CodeDeploy / etc.
・Terraform
・GitHub Actions
・Document management: Confluence / Growi

【Working hours】
10:00〜19:00

【Welfare】
・Social insurance
  *Health insurance, workers' accident compensation insurance, unemployment insurance, employee pension insurance
・Commuting allowance
・Shortened working hour system
・Child care workers are also active in the company!
・MacBookPro provided
・Highly flexible development environment / 4 days a week remote work possible
・Peer bonus system to subsidize café/drinking/daily housekeeping expenses, etc.
・Efforts to prevent passive smoking: No smoking
・Assistance for certification acquisition:
・Subsidy for examination fee upon passing the exam
・AWS Associate level: 16,500 yen
・AWS Professional level: ¥33,000

【Holidays】
Saturday/Sunday/National Holiday
Annual Paid Leave
New Year Holiday
Congratulations & Condolence Leave

スキル・資格

【Required】
・Strong desire to overlap with the team vision "Find users' problems, solve them faster than anyone else, and continue to provide value".
・5+ years of back-end development experience
・Experience in leadership or project management
・Skills in requirements analysis, basic design and detailed design documentation
・Able to communicate in Japanese
・Able to come to the office about once a week (not residing overseas)

【Preferred】
・Experience in BtoB SaaS system development or BtoC system development
・Experience in building and operating servers using AWS / GCP
・Experience in development using frameworks such as Spring Boot
・Experience in Pull Request based development using GitHub / Gitlab, etc.
