## 募集要項

Responsibility :

• Work closely with Developers, QA and DevOps
• Configure, document, optimize and support the components of the DevOps infrastructure
• Design and develop the business's infrastructure architecture
• Build automated deployments using configuration management technologies
• Provide support and maintain Production, Staging and Dev environments
• Conduct technology evaluations and research
Qualifications & Competences:
• Extensive hands-on experience with AWS infrastructure
• Strong background in Linux/Unix Administration, with a solid understanding of networking
• Knowledge of Docker and Kubernetes
• Experience organizing infrastructure and configuration as code using Ansible, CloudFormation, Terraform or equivalent
• Experience working with modern development pipelines using Bamboo, ArgoCD or similar tools
• Proficiency in code and scripting languages (Bash, Python)
• Ability to design systems from scratch and integrate components into existing designs

Requirement:
• Working knowledge and experience running PostgreSQL and/or MySQL databases in production, including basic installation, configuration and backup-restore operations
• Experience with Kafka, Redis, MongoDB
• Experience with OpenSearch (ELK)
