### 募集要項

#### COMPANY OVERVIEW

A global Design & Build Engineering firm that specializes in providing Building Services for various construction and infrastructure projects mainly Advanced Technology Facilities / Data Centers / Semiconductor, Industrial and Cleanroom projects.

Our client is looking to hire a **Senior Project Engineer/ Project Manager** based in **Petaling Jaya, Selangor** to join their dynamic team of engineers as they grow rapidly.

#### JOB RESPONSIBILITIES

- Actively engaged in project bidding and tendering, procurement control, technical proposals, system design, site coordination, project execution and management, drawing management, profit and budget control and lastly project completion/handover.
- Develop expertise in Design & Build projects, specializing in various building services such as HVAC, BMS, ACMV, Fire Protection, MEP, and Industrial Processes for Advanced Technology Facilities, Data Centers, Semiconductor, or Cleanroom projects.
- Ensure project site execution adheres to approved specifications, procedures, and requirements.
- Coordinate with clients, consultants, subcontractors, and relevant authorities to resolve technical issues on-site.
- Responsible for timely project completion and staying within the budget.
- Participate in multiple meetings with subcontractors and clients, such as Toolbox Meetings (TBM) and Work Progress

Review Board (WPRB) meetings.

- Convert construction drawings into verbal instructions, prepare shop drawings, and update as-built drawings.
- Ensure strict compliance with Safety & Health regulations.

#### **JOB REQUIREMENTS**

- Bachelor's degree in Mechanical/Electrical/Civil Engineering, Architecture, Structural Engineering, or related field.
- Minimum 3 years of work experience in engineering or building and construction works
- Proficiency in Mandarin will be advantageous

Thank you!
