募集要項

Company and job overview

Our client is an IT/Software company.

Job Responsibilities
- Responsible for developing dedicated software to control MFPs and related optional devices.
- Perform debugging and evaluation using hardware devices and simulators.
- Support communication and coordination between our company and business partners as a bridge engineer.
- Understand requirements and reporting progress in Japanese, explain specifications and action plans to business partners, and provide appropriate instructions to ensure product quality.
- Support Japanese communication happening in the project.

Job Requirements
- Bachelor's degree in a Computer Science-related field, or equivalent experience.
- More than 3 years of experience as a bridge engineer in embedded software development or more than 5 years of experience in software development using C/C++ languages.
- Proficiency in Japanese at N2 level or above, with fluent speaking, listening, and writing skills.
- Proficiency in English, with the ability to speak, listen, and write.
