募集要項

We are hiring a Senior Java Developer to join a core banking project at a major financial client. The role requires end-to-end backend system development, including design, coding, testing, and deployment in a fast-paced, high-trust environment.

Client Details

The client is a leading global financial institution with long-standing operations in Japan. This project is part of their digital modernization effort in core banking systems and payment platforms. The team is international and engineering-driven, with a strong focus on reliability and performance.

Description

- Lead backend development using Java for critical financial platforms
- Collaborate with architects and analysts to define technical solutions
- Design and implement multithreaded components and optimize system performance
- Conduct unit and integration testing, ensure code quality

- Troubleshoot, deploy, and support applications in production environments

Job Offer

- Long-term renewable haken contract
- Potential to convert to permanent employee in the future
- Competitive salary
- Attractive benefits
- English-speaking, international work environment
- Work hours: 9:00-17:30, Monday to Friday

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

スキル・資格

- 6+ years of professional Java development experience, ideally in banking or financial services
- Strong understanding of multithreading, concurrency, and performance tuning
- Experience in full SDLC from design to deployment and post-release support
- Familiar with enterprise-level frameworks and messaging (e.g., JMS, Kafka, etc.)
- Independent, hands-on engineer who can manage their own scope with minimal supervision

会社説明

The client is a leading global financial institution with long-standing operations in Japan. This project is part of their digital modernization effort in core banking systems and payment platforms. The team is international and engineering-driven, with a strong focus on reliability and performance.
