募集要項

Play a key role as a bilingual SRE alongside like-minded and enthusiastic engineers!

You Will:

- **Cloud Infrastructure:** Design, build, and operate cloud infrastructure with a focus on cost efficiency and scalability.
- **Automation & CI/CD:** Develop automation tools and improve CI/CD pipelines to streamline operations and deployments.
- **Monitoring & Incident Response:** Set up monitoring, alerts, and handle incident response and postmortems to maintain system reliability.
- **Performance & Capacity:** Conduct capacity planning and performance tuning to ensure optimal system performance.
- **Access & Metrics Management:** Manage identity and access for dev tools and define/track SLOs and SLIs for service quality.

Join this top AI-tech company and help towards their goals of growing to No.1 within their niche in Asia.

Conditions:

- Fully remote work
- Flextime system

スキル・資格

Must-Haves:

- Experience with cloud infrastructure (AWS/GCP/Azure) and Linux/Unix administration
- Skilled in Infrastructure as Code (Terraform, Ansible)
- Experience with Docker and Kubernetes
- Built and operated monitoring systems and CI/CD pipelines
- Basic networking knowledge
- Business-level Japanese & English communication

Nice-to-Haves:

- Experience managing microservices architecture and optimising cloud resource usage
- Proficient in programming (Python, TypeScript, Shell scripting) and database administration
- Knowledge of security best practices

Fit 75% of the requirements and are feeling unsure? Feel free to apply anyway!!
