募集要項

[Role & Responsibilities]
You will be a key player in the migration of our client's SAP system to S/4HANA, building and integrating applications on the SAP Business Technology Platform (BTP). You'll translate complex business needs into innovative, efficient IT solutions, working closely with a talented team to deliver high-impact results. You'll be involved from the project's development phase, gaining a deep understanding of the new system's specifications. This is a fantastic opportunity to contribute significantly to a major enterprise system transformation.

[Main tasks include]
- Develop and deploy applications on SAP BTP, leveraging its diverse services and capabilities.
- Collaborate with architects and stakeholders to ensure project success.
- Participate in all phases of the software development lifecycle.
- Implement and maintain CI/CD pipelines for automated processes.
- Troubleshoot and resolve technical issues related to application performance and security.
- Stay current with the latest Java development, cloud computing, and integration platform trends.

スキル・資格

- Experience implementing SAP S/4HANA and SAP BTP.
- 2+ years of software development experience (SAP ABAP, JavaScript, Java).
- Experience developing and maintaining SAP S/4HANA add-on features using Side-by-Side and On-Stack extensions (BTP).
- Experience developing SAP Fiori screens.
- Excellent problem-solving and analytical skills.
- Strong collaboration and communication skills.
- Proficiency in English for effective communication within the team.
- Experience with Agile methodologies.
- A passion for innovation and continuous learning.
- Commitment to delivering high-quality work.
