### 募集要項

Job Title: Automation Engineering Manager

Location: Bac Ninh, Vietnam

#### Position Overview:

Our client is a global leader in designing and manufacturing high-performance interconnect systems for industries such as automotive, aerospace, industrial, and consumer electronics, with strong operations in Vietnam and other key hubs.

#### Key Responsibilities:

- Lead and manage the automation engineering team to develop, implement, and optimize automated manufacturing systems and processes.
- Drive continuous improvement initiatives through automation to enhance productivity, quality, and cost-efficiency.
- Collaborate with cross-functional teams including production, quality, and maintenance to ensure seamless integration of automation solutions.
- Oversee the design, programming, and commissioning of automation equipment including PLCs, robotics, and vision

systems.

- Ensure compliance with safety standards and engineering best practices in all automation projects.
- Support new product introductions and engineering changes from an automation perspective.
- Manage vendor relationships and evaluate new technologies for potential implementation.

Requirements:

- Bachelor's degree in Automation Engineering, Electrical Engineering, Mechatronics, or related field.
- Minimum 5 years of experience in automation engineering within a manufacturing environment, with at least 2 years in a leadership role.
- Strong knowledge of industrial automation systems, PLC programming, robotics, and HMI/SCADA systems.
- Proven track record in project management and cross-functional collaboration.
- Excellent problem-solving and communication skills.
- English proficiency required.
