募集要項

About the Role

You will lead electrical design, grid coordination, and technical execution across utility-scale renewable energy projects, working closely with stakeholders such as utilities, EPCs, and regulatory bodies.

Must-Have Requirements

- Native-level Japanese and business-level English
- 4+ years of engineering experience, including 3+ years in Japan's electric power sector
- Solid experience in:
 - Grid and substation design, grid interconnection applications

- Extra-high, high, and medium voltage systems
 - Electrical design and EPC execution
 - SCADA/EMS systems and utility coordination
-

スキル・資格

Preferred / Good to Have

- Experience with:
- Offshore wind or large-scale BESS integration
- Harmonic analysis, EMS/SCADA architecture
- Commissioning, inspection, and site-based technical supervision
- Electrical/Renewable energy certifications

Ideal Profile

- Engineering professionals with a track record in **EPC or IPP environments**
 - Experience handling utility and government relationships (e.g., METI)
-
