募集要項

About the Role

You will lead electrical design, grid coordination, and technical execution across utilityscale renewable energy projects, working closely with stakeholders such as utilities, EPCs, and regulatory bodies.

Must-Have Requirements

- · Native-level Japanese and business-level English
- 4+ years of engineering experience, including 3+ years in Japan's electric power sector
- Solid experience in:
- Grid and substation design, grid interconnection applications

- Extra-high, high, and medium voltage systems
- Electrical design and EPC execution
- SCADA/EMS systems and utility coordination

スキル・資格

Preferred / Good to Have

- Experience with:
- Offshore wind or large-scale BESS integration
- Harmonic analysis, EMS/SCADA architecture
- Commissioning, inspection, and site-based technical supervision
- Electrical/Renewable energy certifications

Ideal Profile

- Engineering professionals with a track record in EPC or IPP environments
- Experience handling utility and government relationships (e.g., METI)
