募集要項

This role is ideal for an experienced frontend engineer (Vue.js or JavaScript) with backend knowledge in C#/.NET. You'll support web application development used by millions of users, working alongside global teams and product managers in an agile setting.

Client Details

A large-scale global tech company is seeking to expand its development team. Known for cutting-edge systems and large user bases, the company offers a dynamic international culture, robust engineering practices, and long-term project visibility. You'll be part of a team that delivers high-impact digital services.

Description

- Develop and enhance user-facing applications using Vue.js or other JavaScript frameworks
- Maintain and support backend services in C#/.NET
- Work closely with designers, product owners, and QA to deliver clean, scalable features
- Participate in code reviews and follow best practices across the stack
- Collaborate across Japan and overseas teams in a bilingual environment

Job Offer

- Contract Type: Long-term haken (派遣契約) with stable renewal and conversion potential
- Location: Tokyo (hybrid work available)
- Work Hours: 9:00-17:30 (with 1-hour lunch break)
- Compensation: Based on experience, competitive within market range
- Environment: Global communication, bilingual team, high ownership projects

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

スキル・資格

- 5+ years of frontend development experience (Vue.js, React, or similar)
- 2+ years of experience with backend development in C#/.NET
- Experience with RESTful APIs, CI/CD, and testing frameworks
- Ability to work independently and contribute proactively to technical discussions
- English proficiency; Japanese is a plus but not required
