募集要項

Position: Firmware Tester

Location: Banbueng, Chonburi.

Salary: 40,000-43,000 Baht / mth

Responsibilities

- Testing and Validation:
    - Verify machine operation aligns with specific documentation and requirements.
    - Perform simulation and scenario testing on both test boxes and actual machines.
    - Conduct final validation testing before design freezes and releases.

- Documentation and Reporting:
    - Accurately document all test activities, including steps, time, methods, and materials.
    - Identify and document inconsistencies in issue tracking systems (e.g., YouTrack, GitHub).
    - Log the progress of control and machine verification.
    - Maintain accurate reports of all testing.

- Collaboration and Communication:
    - Clearly communicate with firmware developers and other software evaluators to ensure issues are identified and corrected.
    - Organize and assist with lab machine updates.
    - Develop flowcharts, diagrams, how-to guides, and other visual aids for engineering programs.

- System Improvement and Support:
    - Provide design, support, and testing for engineering program software.
    - Recommend upgrades for existing systems and programs.

Qualifications

- Education & Experience:

    Bachelor's

    degree or equivalent is required.

    - Experience with issue tracking systems (e.g., YouTrack, GitHub) is a plus.
- Skills & Abilities:

    - Excellent written and oral communication skills.
    - Ability to translate complex problems using non-technical terms.
    - Good command of English.
