募集要項

Company and Job Overview

An International is a leading specialised food distribution company with an established presence across Southeast Asia and China. We are a full-suite market enabler for food businesses looking to enter and expand

Job Responsibilities

- Work with team members to gather and interpret user/system requirements into design specifications.
- Design and code applications to functional and technical programming standards.
- Develop system specifications and interfaces for complex components.
- To work closely with team member(s) to provide input and feedback on Software documentation, User Manual and Technical manual and to resolve any issues that arise.
- To assist at conducting first level user training (if needed) and assisting in software implementation.

- Maintain applications according to SLAs.
- Work across the Service Delivery Lifecycle on engineering solutions for new system rollouts, major/minor enhancements, and/or ongoing maintenance of existing applications.
- Analyze, design, build, and/or test new components or enhancements to existing modules.
- Any ad-hoc tasks assigned from time to time.

Job Requirements

- Candidate must possess a Degree, Diploma in Software Engineering, Computer Science, Information Technology or equivalent practical experience.
- 5 years of experience in, or related to C#, .Net technology and software development.
- Comfortable with HTML & CSS.
- Creative problem solver and debugger with sound logical thinking.
- Structured thinking for code review, testing, debugging & finding issues is at the core of your thinking process.

Skillset Preferred

- Knowledge of JSON and APIs
- Knowledge of docker and Kubernetes.
- Knowledge of ELK, Redis and RabbitMQ

Knowledge of Masting Gitlab

- Knowledge of ReactJs
