募集要項

Company and Job Overview

An International is a leading specialised food distribution company with an established presence across Southeast Asia and China. We are a full-suite market enabler for food businesses looking to enter and expand

Job Responsibilities

- Work with team members to gather and interpret user/system requirements into design specifications.

- Design and code applications to functional and technical programming standards.

- Develop system specifications and interfaces for complex components.

- To work closely with team member(s) to provide input and feedback on Software documentation, User Manual and Technical manual and to resolve any issues that arise.

- To assist at conducting first level user training (if needed) and assisting in software implementation.

- Maintain applications according to SLAs.

- Work across the Service Delivery Lifecycle on engineering solutions for new system rollouts, major/minor enhancements, and/or ongoing maintenance of existing applications.

- Analyze, design, build, and/or test new components or enhancements to existing modules.

- Any ad-hoc tasks assigned from time to time.

Job Requirements

- Candidate must possess a Degree, Diploma in Software Engineering, Computer Science, Information Technology or equivalent practical experience.

- 5 years of experience in, or related to C#, .Net technology and software development.

- Comfortable with HTML & CSS.

- Creative problem solver and debugger with sound logical thinking.

- Structured thinking for code review, testing, debugging & finding issues is at the core of your thinking process.

  Skillset Preferred

- Knowledge of JSON and APIs

- Knowledge of docker and Kubernetes.

- Knowledge of ELK, Redis and RabbitMQ

  Knowledge of Masting Gitlab

- Knowledge of ReactJs
