募集要項

About the Role

We are seeking a dynamic and experienced professional to lead and manage initiatives at the intersection of artificial intelligence, public research funding, and innovation-driven R&D. This role is ideal for someone who thrives in a fast-paced, collaborative environment and is passionate about translating cutting-edge research into real-world impact.

You will play a key role in shaping and executing strategic R&D programmes, managing public grant portfolios, and driving cross-sector collaborations that advance AI technologies and their applications across industries.

Key Responsibilities

- **Grant Programme Management**

- Oversee the lifecycle of public research grants—from proposal evaluation to project monitoring and reporting.
- Ensure compliance with funding guidelines and alignment with national R&D priorities.

- Liaise with funding agencies, research institutions, and industry partners to facilitate successful grant execution.

- **AI Strategy & R&D Oversight**

- Identify emerging AI trends and opportunities for strategic investment.
- Support the development and execution of AI-related R&D programmes.
- Evaluate technical proposals and provide expert input on feasibility, innovation potential, and impact.

- **Stakeholder Engagement & Collaboration**

- Build and maintain relationships with academia, government agencies, and industry players.
- Facilitate public-private partnerships to accelerate technology adoption and commercialization.
- Represent the organization in national workgroups, forums, and strategic planning sessions.
- Prepare high-quality reports, presentations, and policy briefs for senior management and stakeholders.
- Synthesize complex technical and strategic information into actionable insights.

Qualifications & Skills

- Bachelor's or Master's degree in Computer Science, Engineering, AI, or a related field; PhD is a plus.
- 5-7+ years of experience in managing public research grants, preferably in a government or research agency setting.
- Strong understanding of AI technologies, applications, and R&D processes.
- Proven track record in programme or project management within the research or innovation ecosystem.
- Excellent communication, stakeholder management, and analytical skills.
- Ability to work independently and collaboratively across multidisciplinary teams.
